Exit maintenance mode

To exit maintenance mode, connect to your Esia server via SSH and type the following command:

copy

```
esia-configure -S maintenance -A list
```

This will list all ongoing maintenance in this format

```
service_id |   service_name      | device_id | device_name | planned_type |
planned_start      |      planned_end
-----------+---------------------+-----------+-------------+--------------+-
-----------------------+-----------------------
      6410 | GESA_ICMP           |      1884 | Node1       | NOEXEC       |
2021-01-08 11:15:00+01 | 2021-04-08 11:15:00+02
      6409 | GESA_SNMP_LINUX_MEM |      1884 | Node2       | NOEXEC       |
2021-01-08 11:15:00+01 | 2021-04-08 11:15:00+02
      6408 | GESA_SNMP_LOAD      |      1884 | Node3       | NOEXEC       |
2021-01-08 11:15:00+01 | 2021-04-08 11:15:00+02
```

To exit, it service maintenance. Simply execute the same command line but with -A delete. For example, to delete

copy

```
esia-configure -S maintenance -A delete -i 6409,6408
```

A few minutes later the service will run normally again.
