Exit maintenance mode

To exit maintenance mode, connect to your Esia server via SSH and type the following command:

сору

esia-configure -S maintenance -A list

This will list all ongoing maintenance in this format

<pre>service_id planned_sta</pre>	service_name art planned_e	device_id end	device_name	planned_type	
6410	GESA_ICMP	1884	Node1	NOEXEC	1
2021-01-08	11:15:00+01 2021-04-08	3 11:15:00+0	92		
6409	GESA_SNMP_LINUX_MEM	1884	Node2	NOEXEC	1
2021-01-08	11:15:00+01 2021-04-08	3 11:15:00+0	92		
6408	GESA_SNMP_LOAD	1884	Node3	NOEXEC	
2021-01-08	11:15:00+01 2021-04-08	3 11:15:00+0	92		

To exit, it service maintenance. Simply execute the same command line but with -A delete. For example, to delete

сору

esia-configure -S maintenance -A delete -i 6409,6408

A few minutes later the service will run normally again.
