

Changelogs

Changelog version 3.5.1

Release date: **September 2025**

New features

- Core: The administration configuration tab has been divided into sub-tabs.
- Core: Dedicated tab for configuring LDAP links
- Core: Migration to ECATP for the entire GESA system (Unitys/Svallinn Scanner)
- Core: Addition of an IP address right to hide node IP addresses.
- API: Added functions for future Android & IOS applications.

New plugin simplification

This allows you to enable formerly “hidden” settings on the following plugins:

- Ping monitoring (CHECK_ICMP and GESA_ICMP)
 - Simplified jitter configuration
 - Number of ping packets sent
 - Interval between packets
- Bandwidth monitoring (CHECK_SNMP_SW_INTERFACE):
 - You can specify input and output speeds on the interface.
 - Warning and critical thresholds in bit/s rather than %.
 - Set the service to warning or critical if the interface is down
- Disk space usage monitoring:
 - Threshold in bytes remaining instead of percentage of use
- WEB page monitoring (CHECK_HTTP and GESA_HTTPS)
 - Activation of content search

Module: Inventory + NIS2

- CSV export for cyfun NIS2 certification (Svalinn licence required):
 - ADM-1: hardware inventory
 - ADM-2: software inventory
- Addition of a basic NMAP scanner

Module: Backup

- Integration of French publisher Arx One
- Synology Hyperbackup integration
- Synology Activebackup integration
- XenOrchestra integration

Module: Hypervisor

- XCP-NG integration
- Nutanix integration
- Add all the hypervisors in a cluster at once

Plugins

- Stormshield: IDS monitoring
- Fortinet
 - FortiManager supervision
 - FortiAuthenticator supervision
 - FortiAnalyzer supervision
- Addition of Ruckus access points
- Addition of Audiocode telephone exchanges
- Addition of Eaton UPS external probes

Alerting

- Ticket tools: Hubbiz
- Ticket tools: GLPI

Improvements

- Core pattern: it is no longer possible to delete the last service in a pattern, the pattern must be deleted directly.
- Server: Performance improvement for the disk tab on the server node for some Windows.
- Switch: Upgrade and support for Netgear professional MAC address scanning.
- IPAM: Automatic deletion of old scans
- IPAM: public IPs can be reserved
- Svalinn scanner: node group selection takes subgroups into account

Fixed bugs

- Core: correction of the legend on the one-year graph
- Core: plugin administration: tablesorter filters on the service tab don't work
- Core: note on nodes when acknowledging the note is not added in some cases
- Core: "run now" or "test settings" buttons sometimes show a permissions error message
- Heart: Replacing unity problems with gesa_health
- Core: Translation of login page error message (translation and spelling)
- Heart: Unity being deleted visible in the list of Unity added.
- Report: the 'Service value' block does not display minimum and maximum values.
- Report: capacity planning: limited to 2 decimal places.
- Report: the "generate report" button generates a blank page.
- Dashboard: duplication of dashboard, correction of language variables
- IPAM: network top does not display unsupervised nodes
- Plan: correction of hypervisor interfaces for wheathermaps (bandwidth plan)
- Svalinn scanner: fixed scanner blocking in certain cases
- Backups: driver folder in wrong location
- Hypervisor: The service status table is sometimes displayed twice.
- Installation: Fixed iptables entries containing duplicates.
- Installation: Esia lite - SQL patterns problem

All versions

- [Version 3.5.1](#) [September 2025]
- [Version 3.5.0](#) [February 2025]
- [Version 3.4.1](#) [April 2024]
- [Version 3.4.0](#) [October 2023]
- [Version 3.3.1](#) [June 2023]
- [Version 3.3.0](#) [September 2022]
- [Version 3.2.7](#) [October 2021]
- [Version 3.2.6](#) [March 2021]
- [Version 3.2.5](#) [July 2020]
- [Version 3.2.4](#) [December 2019]
