

Add a licence file

Once your Esia licence has been renewed and validated by our administrative department, we will send you a file containing the new licence to be applied to your server. Please ensure you follow the steps below to apply this new licence to your server and prevent monitoring from stopping on the previous date.

Download the licence file via the link sent to you by email. Then, log in to your Esia web interface (the user account must be in the **root** group or have the **esia_administration** permission).

Warning, if you have a Svalinn license, you must first upload the Mercury or Heimdall license before the Svalinn license.

The screenshot shows the Esia web interface. At the top, there are status bars for 'ETAT DES NOEUDS' (22 green, 3 yellow, 7 red, 1 grey) and 'ETAT DES SERVICES' (140 green, 3 yellow, 7 red, 17 grey, 0 blue). The main content area is titled 'INFORMATION SUR LA LICENCE' and contains the following information:

INFORMATION SUR LA LICENCE	
ID de la licence	[REDACTED]
Type de la licence	[REDACTED]
Nombre de noeuds	[REDACTED]
Partenaire revendeurs	1
Date d'expiration	18/08/2026
INFORMATION SUR LA VERSION

Distribution :	Debian version 13.4 Linux vsrv-dev-quentin-0 6.12.74+deb13+1-amd64 #1 SMP PREEMPT_DYNAMIC Debian 6.12.74-2 (2026-03-08) x86_64e
Date de mise en ligne :	20/04/2026 15:44:15
INFORMATIONS GÉNÉRALES	
Adresse e-mail	support@esia-sa.com
Société :	Esia SA
Site web :	http://www.esia-sa.pro/

1. Go to the **About** menu
2. In the top right-hand corner, click on **Upload a licence file**
3. Once the licence file has been successfully uploaded, check the expiry date of your licence

The Esia daemon will restart automatically within 5 minutes to apply the changes.
