Installing and configuring the IP Label web plugin

Installation

To install the IP-Label Web Plugin on your Galaxy and Infinity, simply type the following command lines:

none

apt update apt install esia-webp-iplabel

The Web Plugin is now installed and you can connect to your Esia interface.

Adding the node

Go to administration and click on add node.

Enter the name, node group, etc. and, most importantly, specify the "IP Label" node type. Then click on add.

| AJOUTER UN NOEUD | | | (> |
|------------------------|-----------------------------|----------|---------|
| | | | |
| INFORMATIONS GÉNÉRALES | | | |
| Nom du noeud | Type de noeud | O Groupe | |
| IP label Wiki | IP Label | cloud 🗶 | |
| | | | |
| Adresse IP | Connecté derrière la Unity: | | |
| 0.0.0 | none | | |
| Description | | | |
| | | | 1. |
