

Dashboards

ESIA lets you create as many customised dashboards as you like. The aim here is to emphasise the points of importance relative to each user. You create a tile, size it and integrate the information that is of interest to you. A tile can contain one or more **widgets**. To find out more about widgets, please consult the [list of widgets](#).

Add a dashboard

Go to the "My Dashboards" tab and click on « **Ajouter un tableau de bord** ».

TECHNIQUE - ROUTINE

ALERTES CRITIQUES

NOM DU NOEUD	GROUPES	ALERTES	SERVICES
WAN	Autres	Critique	PING
Internet	Service	Critique	PING
proxmox_cluster	hyperviseur	Critique	Accès hyperviseurs
NAS-QNAP	Noeuds > NAS	Critique	Espace Disque
AMID05099C98IEC	Noeuds > Serveur physique	Critique	PING

TOP DES NOEUDS EN ERREUR

NOM	NOMBRE D'ERREUR
site-esia	24
Internet	8
Poseidon2 3266	3
apc453COE	3

1 0 0 0

You will arrive on the following page:

TABLEAU DE BORD

Ajouter une tuile

You can rename the dashboard by clicking on the  icon, but you can also give it a **description** and **share it** with other users in **read and/or write** and **generate a public link**.

MODIFICATIONS GÉNÉRALES

Nom: new dashboard

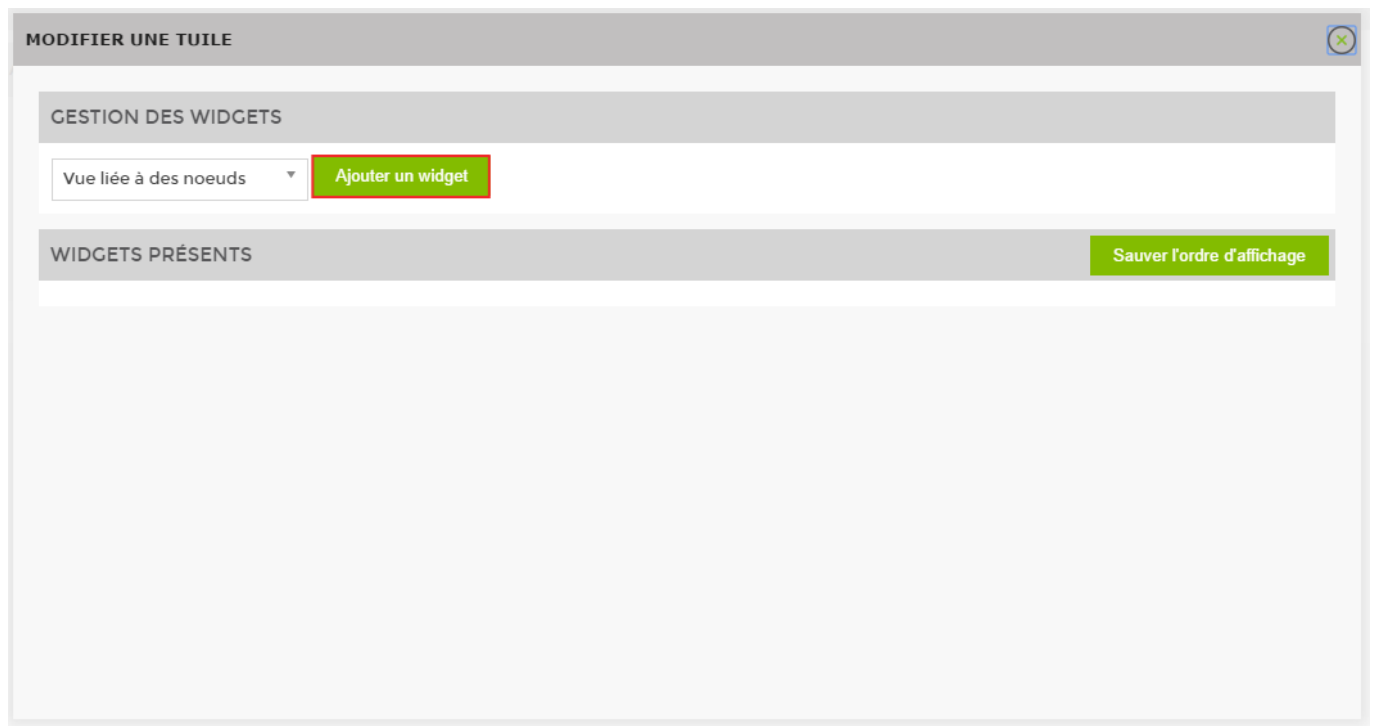

Description: [input field]

Partager par lien public: Générer

Partager le tableau de bord avec (lecture): [input field]

Partager le tableau de bord avec (écriture): [input field]

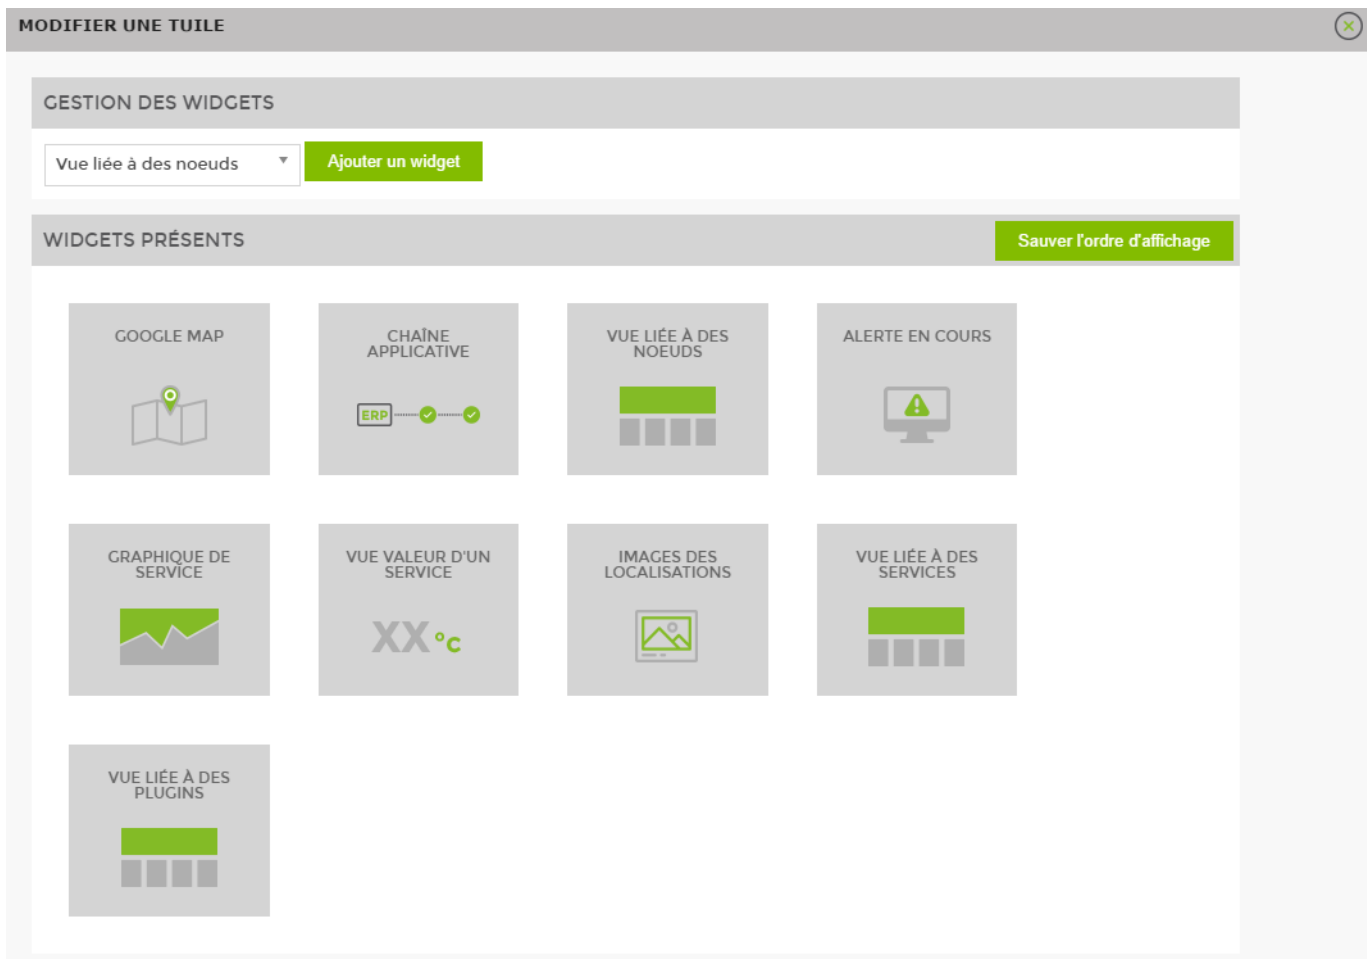

Click on **“add a tile”** then on the  to configure your tile as shown below.

This takes you to the menu for modifying a tile. Tiles allow you to display widgets that bring up information about your nodes in a graphical and easy-to-understand way.

Adding widgets

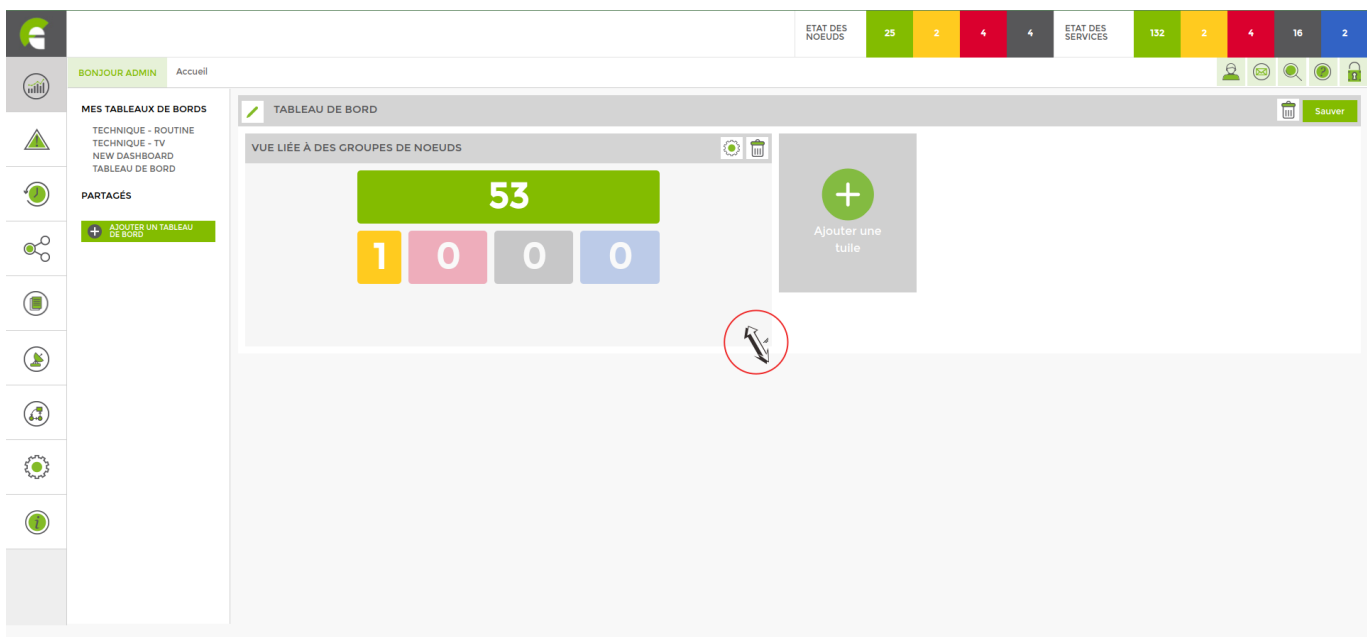

Once in the tile modification menu, choose the type of widget you want to add, then click on the widget that appears just below it.

To find out how to set up your widgets, go to the page [widgets](#).

You can integrate several widgets into a single tile. This will cause the widgets to scroll one by one every 30 seconds (times can be set).

You can now save and return to the initial page of your dashboard. Feel free to add as many tiles as you like. You can adjust the size of the tiles dynamically by left-clicking on the next part of the tile:
