SNMP activation on Plug & Track probes

This tutorial has been made available to the entire Esia community thanks to the contribution of our partner Rcarré.

Their website: https://www.rcarre.com

Connect to the Web interface of your probe by entering the IP address.

Click on “System Configuration”, then on the “SNMP” tab and identify yourself.

Once logged in, change only the “Read Community” parameter to “ESIA” and leave the other parameters at their default values.
