

SNMP activation on a Sophos firewall

Once you have logged into the interface, the dashboard will look like the image below:

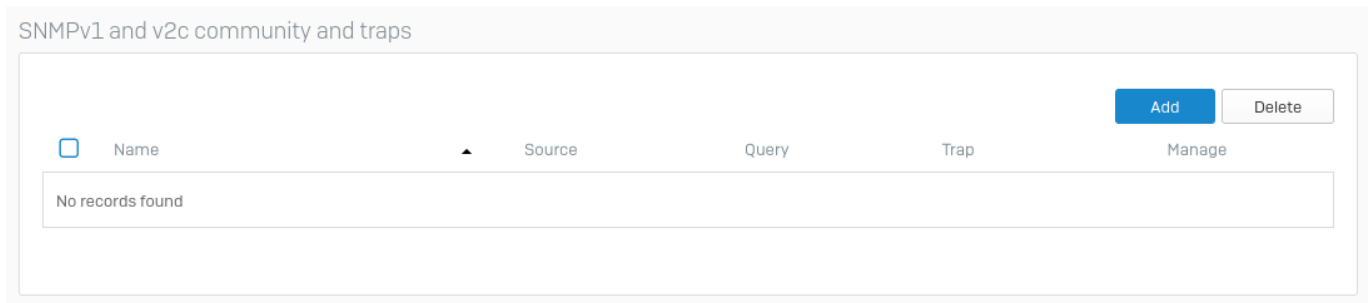

Click on “ **Administration** ” appearing in the list on the left, and then on “ **SNMP** ” This will take you to the SNMP configuration page.

First, enter the information requested in the « **Agent configuration** » section, as shown in the image below:

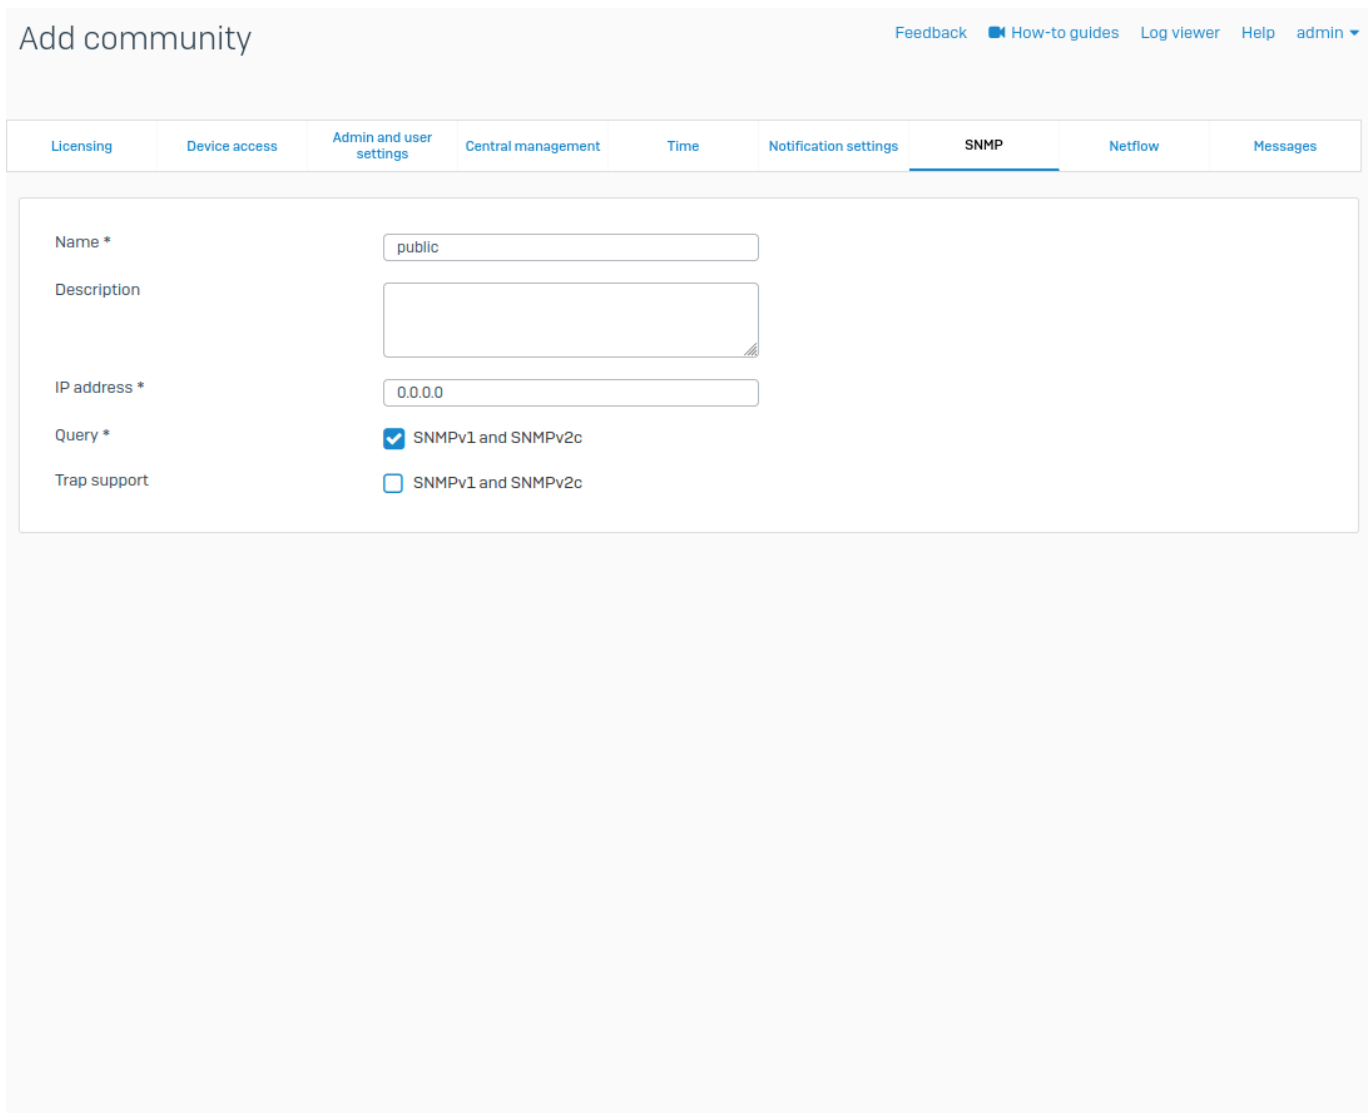

A notification (Agent configuration changes has been applied successfully) will appear in green after clicking on « **Apply** ».

In the « SNMPv1 and v2c community and traps » section, click on Add, as shown in the image below:

You are now on the « **Add community** ». Please enter the appropriate information:

- name: name of the SNMP community.
- IP address: IP of the machine making SNMP requests (esia server).

A screenshot of the "Add community" configuration page. The page has a navigation bar with links for Feedback, How-to guides, Log viewer, Help, and admin. Below the navigation bar are tabs for various settings: Licensing, Device access, Admin and user settings, Central management, Time, Notification settings, SNMP (selected), Netflow, and Messages. The main form contains the following fields:

- Name *: public
- Description: (empty text area)
- IP address *: 0.0.0.0
- Query *: SNMPv1 and SNMPv2c
- Trap support: SNMPv1 and SNMPv2c

At the bottom of the form, there are "Save" and "Cancel" buttons.

You fill in and save the data by clicking on « **save** » you return directly to the home page.
