

SNMP activation on a Sophos firewall

Once you have logged into the interface, the dashboard will look like the image below:

The screenshot shows the Sophos Firewall administration interface. On the left sidebar, under the 'Administration' section, the 'Administration' link is highlighted with a red box and the number '1'. In the main content area, the 'SNMP' tab is highlighted with a red box and the number '2'. The 'Agent configuration' section contains fields for enabling the SNMP agent, setting a name, description, location, contact person, and specifying agent and manager ports. Buttons for 'Apply' and 'Download MIB' are also present.

Click on “ **Administration** ” appearing in the list on the left, and then on “ **SNMP** ” This will take you to the SNMP configuration page.

First, enter the information requested in the « **Agent configuration** »section, as shown in the image below:

The screenshot shows the 'Agent configuration' page. Under the 'Enable SNMP agent' checkbox, which is checked, the 'Name *' field contains 'fw-dev-sophos' and the 'Description' field contains 'Firewall Sophos'. The 'Location *' field contains 'Baie dev', 'Contact person *' contains 'support@esia-sa.com', and the 'Agent port' and 'Manager port' both contain '161'. At the bottom, there are 'Apply' and 'Download MIB' buttons.

A notification (Agent configuration changes has been applied successfully) will appear in green after clicking on « **Apply** ».

In the « SNMPv1 and v2c community and traps » section, click on Add, as shown in the image below:

You are now on the « **Add community** ». Please enter the appropriate information:

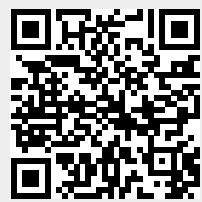

- name: name of the SNMP community.
- IP address: IP of the machine making SNMP requests (esia server).

Licensing	Device access	Admin and user settings	Central management	Time	Notification settings	SNMP	Netflow	Messages
Name *	<input type="text" value="public"/>							
Description	<input type="text"/>							
IP address *	<input type="text" value="0.0.0.0"/>							
Query *	<input checked="" type="checkbox"/> SNMPv1 and SNMPv2c <input type="checkbox"/> SNMPv1 and SNMPv2c							
Trap support	<input type="checkbox"/> SNMPv1 and SNMPv2c							

Save **Cancel**

You fill in and save the data by clicking on « **save** » you return directly to the home page.
