NXlog

Installation

.exe file to run that you can download ici. NXLog runs in the background without a graphical interface.

note: Nxlog is proprietary and licensed.

Configuration

Open the :

copy

```
C:/Program Files/nxlog/conf/nxlog
```

Uncomment :

```
#LogLevel INFO

#LogFile %MYLOGFILE%
```

Then add

copy

```
<Output syslog>
    Module            om_udp
    Host        « adresse ip »
    Port         514
    Exec        to_syslog_bsd*();
</Output>
```

It is possible to send in TCP by replacing om_udp with om_tcp

*this is an example, we extract files in BSD format

copy

```
<Route default>
    path eventlog => syslog
</Route>
```

This is the minimum configuration. Please refer to the documentation official for full and/or advanced configuration.
